

What Clinically Integrating Your Supply Chain Brings to Your Hospital

Clinically Integrated Enhanced Supply Chain Management

Until now there has not been a simple, automated way for U.S. hospitals to track lost, wasted and expired supplies.

The right supply management technology can improve the safety, quality, cost and traceability of supplies across the enterprise, enabling hospitals to stay competitive, improve profit margins and provide best-in-class care.

The Genesis Difference

Genesis Automation helps healthcare providers achieve value-based purchasing quality and cost initiatives, freeing clinicians and leadership to execute on the mission of improving the health of patients.

Reduce total supply costs by 20% while increasing patient safety.

Clinicians spend less time managing supplies and more time with patients

Increase your charge capture accuracy by more than 25%

“Genesis Automation is the most comprehensive and easy to use, system-wide solution on the market.”

- Reduce expiry and patient risk
- Eliminate excess inventory
- Reduce cycle-counts
- Free up time spent dealing with recalls
- Eliminate dependency on costly cabinet systems

- Optimize preference cards
- Optimize OR time
- Comply with case documentation requirements
- Reduce wastage
- Free up clinical staff time from managing supplies
- Increase charge capture
- Prevent recalled or expired product from ever touching a patient

- Reduce expiry and patient risk
- Eliminate excess inventory
- Improve auto-replenishment and adjust to optimal stock levels
- Reduce consignment liabilities
- Free up clinical staff time from managing supplies
- Increase charge capture
- Manage stock with a combination of periodic and perpetual inventory

Working With Genesis Means:

-  Single comprehensive platform enabling traceability from the receiving dock to the patient, enterprise-wide.
-  Real-time solution for capturing full cost per procedure
-  Built on a foundation of healthcare expertise and is committed to addressing the most important issues in healthcare
-  Automatically prevent the use of any expired or recalled device
-  A powerful, handheld computer that automatically syncs to patient records using a cloud-based system
