

Point of Care Traceability

Deliver better, safer Patient Care with clinically-integrated, real-time tracking of medical supplies. Traceability from Purchase to Patient allows you to capture TOTAL Case Cost and compare Patient Outcomes.

VALUE-BASED CARE

Genesis empowers health systems to take control of their supply chains, improving safety, compliance, cost audits and traceability.

We do this by tracking medical supplies from every point-of-arrival to point-of-use. By connecting supply use to the patient and clinician, we eliminate never events (e.g. wrong implant for procedure), alert to use of expired supplies, improve recall management and capture actual costs of every procedure.

IMPROVE PATIENT SAFETY

- ✓ Track & Trace Implants, Blood, Tissue, Consumables, Consignment and Assets
- ✓ Trace Product to Patient with Real-Time Safety Alerts and EHR Integration
- ✓ Prevent OR Delays and Errors Resulting from Missing Supplies or Incorrect Pulls

PREFERENCE CARDS

Create and update preference cards and manage surgeon information to prevent disruptions and delays. Better manage supplies with comparative surgeon, procedure and supply costing data, and automate the re-ordering process.

PERIOPERATIVE SUITE

Automatically load surgeon preference cards and capture a full list of the materials and equipment used on the patient. Real-time information prevents use of the wrong implant for the procedure, and use of recalled or expired equipment.

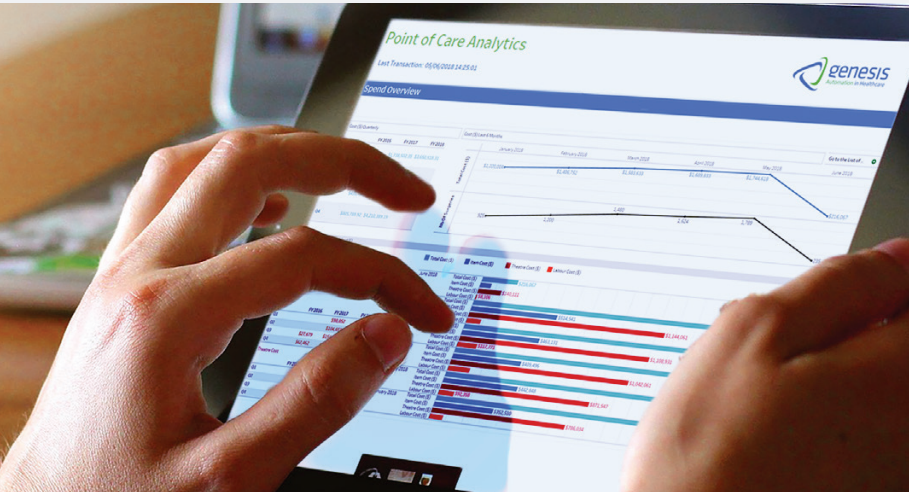

PATIENT'S BEDSIDE

Tie location of resources to the patient, capturing not only equipment used, but also staff time for a complete view of case costs. A simple scan eliminates time spent on documentation, allowing more time for patient care. All captured in the EHR.

GET ON TRACK FOR A BETTER PAYBACK

Genesis clients routinely reduce expenses by over 20%, and the Genesis Point of Care Traceability solution typically pays for itself within the first year. Examples of savings include a UK client saving \$922,500 on Loan Kits over 12 months, and another which saved over \$1.5 million, primarily as a result of improved stock management.

KNOW THE COMPLETE COSTS OF CARE

*Genesis Analytics Dashboard

GO MOBILE. ANYTIME. ANYWHERE.

- All Preference Card Information at Your Fingertips
- Ultra-Fast ScanSweep Technology Saves Time
- Access to the Entire Product Catalogue
- Add Barcodes As-Needed
- Safety Alerts at the Point of Care
- Identify Discarded Items & Reason Why

ABOUT GENESIS

We help healthcare organizations charter their two most important missions: Patient Care and Cost Containment. In doing so, we are redefining what the supply chain means for value-based care. Our affordable, clinically-integrated solutions capture, track and benchmark utilization of resources at the multiple touchpoints impacting patient safety and the hospital's cost centers. We extend this value-chain by linking purchases to patient outcomes and providing business intelligence to eliminate waste, improve charge capture and alleviate risk.

The bottom line? We help you deliver patient care safely and effectively, and provide a full view of the TOTAL costs of care.

“ Knowledge is power. Not only does this provide us with a level of data and insight that can be used to better challenge clinical practice and variation, helping us to reduce inefficiencies and improve patient experience and outcomes – more importantly it ultimately helps to safeguard our patients from avoidable harm. In the event of a product recall, we can now easily and quickly track an affected product to the right patient.

- Dr. Tim Wells, Consultant Cardiologist, New Hall Hospital
